SHOP BUSINESS ANALYSIS

## GET A DIAGNOSTIC CHECK OF YOUR SHOP

The Shop Business Analysis (SBA) will evaluate the key points in your business:

- Website
- Finances
- Sales
- Social Media
- Marketing
- Production

Shop Business Analysis (SBA) was created to uncover the strengths and weaknesses in your shop. It is an analysis of every area of your business—from marketing and sales, to production and profitability, along with a visual inspection of the key points of your facility done via video and or photographs. We will review all your marketing, including your on-line social media presence.

To top it off we provide an in-depth consultation with DRIVE top three master consultants each covering a different area of your business.

## Building Profitability into Financial Stability Starts Here!
